If your
youngster doesn't
fit the pattern,
where should
he go to
college?

To the
college that
doesn't fit
the pattern.

Shimer College has been called "One of 11 U.S. campuses with an ideal intellectual climate."

— *Harvard Educational Review*.

We've also been called "Unknown, unsung and unusual." — *Time*.

It's true we don't fit the pattern. At Shimer a "professor" is simply a teacher. He's here because he loves to teach.

Shimer has no fraternities, and no sororities. No football, and no frills. Students initiate their own activities. And they discover there is plenty of excitement in learning itself.

At Shimer a textbook is a rarity: We like to read from the original. We favor small classes (and lively discussion) in each of three broad areas. Social Sciences. Natural Sciences.

Humanities. Period.

The system works. Ask how our students do in the Graduate Record Exam.

Christopher Jencks and David Riesman observe, in the *Phi Delta Kappan*, that

there is "impressive statistical evidence that (Shimer) students are

better prepared for graduate work in the arts and sciences, and in the professions, than those who have specialized in particular areas."

Interestingly enough, one-fourth of these high-flyers come to Shimer from the second or third year of high school!

No question, this is a different kind of college.

But perhaps you're a different kind of student. Or you've raised one. Then you really ought to write Ralph Hough, our Director of Admissions.
